

## Digital thermometers

### Specifications:

Dial size:	3",4"
Display:	LCD
Case:	SS304 case, bezel
Sensor:	Ceramic resistance
Window:	Glass
Stem:	SS304, 6.35mm diameter with different length
Read interval:	Every 6 seconds
Connection:	Bottom, back or adjustable for option
Resolution:	0.1 °C
Accuracy:	±1%
LCD display:	3 Digital

Ambient/Process temperature: -20 °C to 50 °C

Temperature Range: -50 to 500 °C temperature can be made according to customer's requirements

### Application:

- A wide range of applications for heating, ventilation, air conditioning, food processing, waste water, industrial processes or compressors

### Features:

- 304 stainless steel case, stem and socket
- Detachable thermometer case
- Ceramic resistance sensing element
- Fully adjustable, bottom or back connection optional
- 4" (100mm), 6" (150mm) and 9" (230mm) stem lengths
- Fahrenheit or Celsius scales available
- A solar powered digital thermometer that provides a local temperature reading to 1/10 of a degree

### Models:

Bottom connection

Adjustable connection
